### DETAILED ACTION

This Office action is in response to the application filed January 14, 2001.

#### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 16-34 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 16 recites a “two-dimensional” support. It is confusing based on the fact that pictures and drawings are two-dimensional, while supports, objects are generally three-dimensional. Clarification is necessary.

Secondly, claim 16 recites “... the layer comprises a sulphobetaine”. This phrase is confusing and indefinite. Does it refer back to the “radiation-sensitive layer” or to a separate and second layer apart from the radiation sensitive layer. Clarification is necessary.

Thirdly, claim 17 is unclear when reciting that the radiation sensitive layer comprises a combination of a polymerizable monomer or oligomer and a photopolymerization initiator. The confusion arises as to the components desired in the radiation-sensitive layer as recited in claim 2. Does the layer further comprise a photopolymerizable monomer and photopolymerization initiator with the diazonium component or is the desire to recite a new scope with the polypolymerizable monomer and initiator as the only radiation sensitive components in the radiation sensitive layer. Clarification is necessary.

*Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 16-34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by KANDA et al.

The claimed invention is drawn to a recording material, which comprises a dimensionally stable, two-dimensional support and a negative-working, radiation-sensitive layer, which comprises a diazonium salt and a polymeric binder, the layer comprises a sulphobetaine. The claims are further drawn to process for the production of a printing plate for offset printing as recited in claim 30.

KANDA et al anticipates the claimed invention at Examples 1 and 2 wherein composition is disclosed having a polymer comprising a sulphobetaine with diazonium salt, see Table 1 in column 13, lines 24-45 and column 14, line 29 – column 15, line 40. Further the Example 1 and 2 recite a process of forming a printing plate.
